Veteran-Owned (SDVOSB)

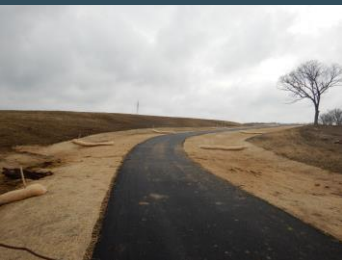

Founded in 2015, AMERICAN VETERAN INDUSTRIES, LLC began as a privately held and certified SDVOSB (Veteran-owned) landscape construction firm.

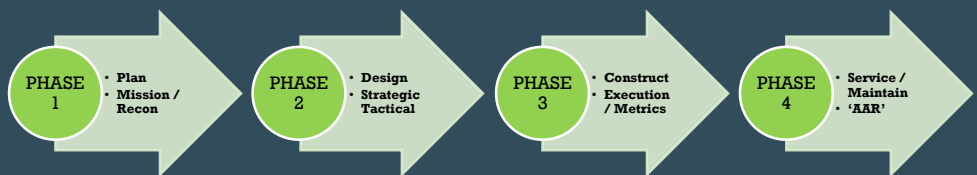

In 2019, we expanded our practice into professional architectural / engineering services with a focus on construction management and project management.

On July 2, 2019, the company obtained it's federal CAGE code (#8BVN2) and is eager to serve our country, once again!

'MISSION MINDSET': We understand not every project may go smoothly, and we also understand there are budgetary constraints involved. We attempt to tackle such issues & others with a unique 'mission mindset' approach to managing everything we do. Note, the term "phase" is used deliberately since we consider that End User Client as the most important.

After Action Review (AAR) ~ An after action review is a structured review or de-brief (debriefing) process for analyzing what happened, why it happened, and how it can be done better by the participants and those responsible for the project or event.

"Built on Service"

Our Professional Engineering (CM) Services

CONSTRUCTION INSPECTION: Our Construction Managers work closely together with the owner, designer, and the contractor to ensure that a high-quality construction product is delivered on time and within budget. Our Construction Managers are highly versed in the following:

- Conducting project meetings involving all parties
- Operating as an Owners Agent (Owners Rep)
- Supervising and managing field staff
- Quality Control and Assurance
- Safety compliance, OSHA
- Environmental stewardship
- Diversity (Civil Rights) field monitor

CPM SCHEDULING: AVI Engineering takes pride in the development of schedules that provide clients a useful and reliable project management tool (Primavera P6). We develop schedules that are tailored to the owner's management and reporting needs. Our scheduling services include:

- Resource & cost loading schedules
- Critical path management and reporting
- Development of custom monthly status reports
- Earned value development and analysis
- Look ahead schedules
- Manpower schedules and craft curve development
- Monthly progress updates
- Program level scheduling
- Progress curve development
- Schedule review analysis (claims mitigation)
