

HEITMANN & ASSOCIATES, INC.
BUILDING ENCLOSURE CONSULTANTS

WWW.HEITMANNASSOC.COM

Heitmann & Associates, Inc. is interested in joining the Discovery Partners Institute design team.

For 55+ years the Heitmann Building Enclosure Consulting team has assisted architects in the design and QA/QC process critical to ensure an air- & water-tight facade which is thermally & structurally sound.

We distinguish ourselves in our focus on the interface details critical to achieving a building enclosure which performs as specified, while achieving the architect's design intent.

Heitmann consults on enclosure materials/systems and codes as early as Schematic Design, works on drawings/details/specifications with the design team in through Construction Documents, provides complete Submittal reviews and mark-ups in Pre-Construction, witnesses and reports on Performance Mock-Ups, and provides Quality Assurance Site Visits during Construction Administration.

HAI has a deep portfolio demonstrating successful research & development projects, working with iconic structures for both industry and higher education markets, including the University of Illinois.
