Landscape Architecture

## COMPANY OVERVIEW

Tgda Landscape Architecture (Tgda) is a Chicago-based design office that provides landscape architectural and urban design services, designing built environments where nature and culture thrive at all project scales.

Our rigorous and iterative design process consists of conceptually exploring the unique ecological aspects of each site, defining site program based on project goals, and developing site design principles that guide the team. Our method is collaborative where designs and ideas are tested to uncover social and ecological potentials of each site.

Our unique skill set of technical expertise and holistic, creative, and innovative design solutions enhance site functionality, productivity, and resiliency. We deliver vibrant, healthy places that establish new social, cultural, economic, and ecological infrastructure for benefit of our communities.
